- ✓ Maximum screen size: 6 "
- ✓ Protection features: Scratch resistant

Product description

CIRAFON ULTA-CLEAR (DOUBLE TEMPERED) PRIVACY - iPhone 13/13 PRO/14 + TOOL.

The glass in every smart phone needs to be able to conduct touch effectively while being durable enough for everyday use. With a premium mobile glass from Cirafon, the glass is effectively protected from damage and scratches while retaining the feel of the original screen. Cirafon Ulta-clear (Tempered 9H) - Iphone iPhone 13/13 PRO/14 is specifically developed to suit the high technical performance and overall aesthetic experience of an Iphone iPhone. The cover is treated to limit viewing angles so that the screen can only be seen from the front.

With Cirafon hardened, you get a thin and good protection for the phone's display while giving the same feeling as the original glass on your phone. No rubbery feel as with other traditional screen protectors. The glass also helps to reduce smudges and fingerprints.

Screen protector

One fall is often enough to crack your phone's display, which can be costly and time-consuming to repair. To protect your phone from all kinds of damage, you should always have a screen protector in place. Cirafon offers carefully selected and tested screen protectors that provide a durable surface without compromising touch functionality.

Why glass is better than plastic.

Choosing a screen protector made of glass gives you a completely different feel, combined with unbeatable impact resistance. A glass screen protector is also easier to apply and gives you a hard surface without air bubbles, which are common under plastic. With a screen glass, you won't notice that you have anything on the display and you'll keep the same touch functions as without it.

For optimal protectionComplete the display protection with Cirafon shells
