MDA220 USB

The MDA220 USB allows a corded or wireless USB headset² to connect to and switch between calls from both PC and desk phone.

1. Add desk phone connectivity when used with MDA220 USB.
2. For a list of Plantronics headsets that are compatible with MDA220 USB, visit [plantronics.com/configurator](https://www.plantronics.com/configurator).

Technology Legend

A2DP

A Bluetooth profile that allows high quality audio content to be streamed from one device to another. Listen to streaming media, music and navigation through your headset.

Active Noise Canceling (ANC)

Technology that reverses surrounding sound waves to cancel low frequency noise in order to isolate and minimize ambient noise the user can hear.

Adaptive Power

Automatically downshifts to low power when the wireless headset is close to the base to save battery life and maximize density.

Digital Signal Processing (DSP)

Mathematical manipulation of an information signal to actively reduce background noise for improved sound quality including equalization, acoustic echo cancellation, noise reduction and audio leveling.

Dynamic EQ

Optimizes voice quality on calls and automatically adjusts EQ settings when listening to music or for multi-media playback.

Hi-fi Stereo

Full-range dual channel audio playback capable of frequencies from 20 to over 20,000Hz.

Immersive Audio

Specially designed ear cushions and headband reduce background noise and allow you to focus.

Smart Sensor Technology

Built-in sensors deliver automatic functionality like answering a call by placing the headset on and automatically transferring calls between smartphone and headset.

SoundGuard

Acoustic limiting for protection against sounds above 118 dBA per Telecom Industry Standards.

SoundGuard DIGITAL

All the benefits of SoundGuard, plus anti-startle protection which detects sudden increase in sound and eliminates the increase, and Time Weighted Average (TWA) control which prevents average daily sound exposure from exceeding 85 dBA.

USB-C

For connection to devices using the latest USB 3.1 standard with a smaller plug and allowing connection in either direction.

Wideband

Frequency range up to 6,800 Hz. Meets TIA-920 standard for genuine wideband response.
