Product description

Voxicon QLED TV Series – 43" to 75"

Introduction

The Voxicon QLED TV series combines 4K resolution, modern connectivity, and the Google TV platform in a sleek design available in sizes from 43" to 75". Whether you're presenting in a meeting, relaxing in a lounge, or watching content at home, these TVs provide sharp images, reliable performance, and an interface that's easy to use every day.

Who is it for?

- When you want clear visuals in your meeting room without complicated setup
- If you need a reliable TV for presentations or video calls
- When you want quick access to apps and streaming without external hardware
- If you're looking for a stylish TV that works just as well in a lounge as in a home office

Advantages of QLED compared to LED

QLED technology uses a layer of Quantum Dots to enhance color reproduction and expand color volume. This gives you more accurate shades at higher brightness levels, making details clearer in presentations, video conferences, movies, or sports. Compared to standard LED TVs, QLED delivers stronger HDR performance and keeps its color quality consistent over time – so you can rely on sharp and vibrant visuals day after day.

Google TV – a smarter experience

Google TV brings together apps, streaming services, and recommendations in one simple interface. You can easily switch between Netflix, YouTube, Disney+, or other apps without changing devices. Built-in Chromecast lets you cast slides, videos, or images directly from your phone or laptop, while Google Assistant makes it easy to search and control with your voice. It's a simple and personal way to get to the content you need, whether you're at work or winding down.

Link your Google account – optional

If you link your Google account, you can unlock even more features. Download apps directly from the Google Play Store, build your own Watchlist, and update it from your TV, your phone, or even Google Search. That way your content follows you wherever you go. But it's important to note – linking an account is not required. The TV works fully without it, giving you the freedom to use it just the way you want.

Picture and sound

With 4K Ultra HD resolution and QLED technology, details and colors come through with clarity. HDR formats such as HDR10 and Dolby Vision add depth to both bright and dark scenes, while Dolby Atmos gives you a more immersive audio experience. Together, these features make the series equally suited for presentations, video calls, movie nights, or sports.

Connectivity and compatibility

The series comes with modern connections including HDMI 2.1 with eARC/ARC, USB ports, Ethernet, Wi-Fi, and Bluetooth. Support for HDCP 2.3 ensures compatibility with the latest devices and services. Whether you're connecting a laptop, sound system, or media player, the TV integrates smoothly into your setup.

Design and installation

With its slim profile and minimalist design, the TV blends naturally into different environments. Each model includes a desktop stand and is also VESA-compatible for wall mounting, giving you the flexibility to place it in a meeting room, home office, lounge, or any shared space.

Why choose the Voxicon QLED TV Series?

- QLED with Quantum Dots and 4K for sharp images and accurate colors
- Google TV with apps, voice control, and Chromecast Built-in
- Option to link a Google account for extra features – but not required
- HDR and Dolby support for richer picture and sound
- Available in sizes from 43" to 75" to fit your space and needs
