

Public Cloud

Drive the digital transformation of your organisation

Our Public Cloud services help you run Microsoft Azure in a secure, structured, and predictable way. Choose the level of support and management that fits your organisation. All services are delivered on top of Azure Consume, which provides access to Azure resources, billing, and basic administration.

Azure Monitoring

Visibility and insight into Azure

We monitor the health and availability of your Azure environment so potential issues can be detected early.

- 24/7 monitoring
- Alerting on availability & health
- Centralised insights
- Early detection of incidents

Azure Monitoring & Patch Management

A stable and secure Azure environment

This service adds patch management and proactive alert handling to help reduce risks and improve stability.

- Includes everything from Azure Monitoring
- OS security patching
- Proactive alert handling
- Support during business hours
- Reduced security and availability risks

Dustin Managed Public Cloud

A fully managed Azure platform

This is our most comprehensive service. We manage your Azure foundation based on a standardised Landing Zone aligned with Microsoft best practices.

- Includes everything from Azure Monitoring & Patch Management
- Managed Azure Landing Zone
- Governance and policy updates
- Fault resolution core infrastructure
- Advisory, monitoring, and management
