### PRODUCT DESCRIPTION

#### LONG:

We think webcams should do more. With Facecam, you get not only 1080p 60fps capture, but also uncompressed, low-latency video in lifelike detail and color. Adept in low-light conditions, Facecam even overcomes tricky high-contrast lighting—like bright office windows—thanks to HDR capability. Its software, Camera Hub, offers not just superficial settings, but instead deep DSLR-style control such as ISO and shutter speed to customize your image. What's more, your settings won't disappear when you reboot or change computers. Loaded with features like cinematic FX and Stream Deck compatibility, Facecam does what other webcams don't—because "good enough" is no longer good enough.

#### MEDIUM:

We think webcams should do more. With Facecam, you get not only 1080p 60fps capture, but also uncompressed, HDR video in lifelike detail and colors—even in low light. Its software, Camera Hub, offers not just superficial settings, but instead deep DSLR-style control such as ISO and shutter speed to customize your image.

#### SHORT:

We think webcams should do more. With Facecam, you get more than just true-to-life 1080p 60fps video—you get the image control of a professional DSLR camera.
