Applications

▢▢▢▢▢ innovative USB-C + USB-A 2-in-1 to RJ45 Ethernet Cables greatly simplify the Ethernet connecting solution for USB-C or USB-A enabled devices without the RJ45 port. No more clumsy RJ45 to USB-C/USB-A adapter needed, just one single cable, your devices will instantly have access to high-speed wired ethernet.
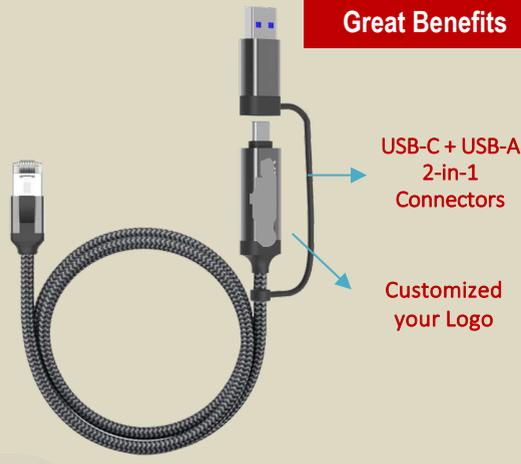

Built-in sophisticated smart chip, this cable provide you stable and secured wired internet up to 1Gbps high speed for your devices without their own RJ45 port.

The unique 2-in-1 USB-C + USB-A design makes this cable work for popular devices, saving you money and no worry what USB port it is.

LAN Connect

USB-C + USB-A 2-in-1 to RJ45 Ethernet Cable

Key Features

【Plug and Play】
No driver required with innovative chipset

【Stable & Safe】
Offer more stable & safety LAN connection than WLAN

【Cost-saving 】
USB-A & USB-C 2-in-1 connection, just one single cable, offer compact Ethernet solution for both USB-C or USB-A devices without the RJ45 port

【Flexible & Durable design】
Textile braided jacket with robust metal alloy connectors

【High Speed】
Transmission rate up to 1Gbps

【Cable Options】
Both standard CAT.6 Shielded cables and slim CAT.6 shielded versions are available

【Wide Compatibility】
Windows, macOS, Android, Thunderbolt™ 3 devices

【Tailor-made Solution】
Customized solution of your Logo, length mark on the connectors to easily identify and promote your brands

Directly Connected USB-C to RJ45 Solution

Directly Connected USB-A to RJ45 Solution

1Gbps

Support Thunderbolt™ 3 Transmission rate up to 1 Gbps

Directly connected No more Adapter

WLAN
