Touchscreen	No

Summary

- ✓ 15.6" IPS display in Full HD for sharp image and wide viewing angles
- ✓ USB-C with video and power via a single cable, fast and convenient
- ✓ Mini HDMI for broad compatibility with more devices
- ✓ Ultra-thin and lightweight design with protective case as a stand
- ✓ Low power consumption, perfect for work on the go

Product description

VOXICON 15.6" Portable Monitor – USB-C & HDMI, IPS, Full HD

Extra screen space, wherever you work

VOXICON 15.6" portable monitor is the perfect solution if you need more screen space without being tied to a desk. With its slim design and low weight, it is easy to carry in your bag and works excellently as a secondary screen for a laptop, tablet or desktop PC. Whether you work from home, at the office or on the go, you get a flexible workspace that increases both productivity and comfort.

Sharp Full HD image with IPS technology

The monitor is equipped with a 15.6" IPS panel with Full HD resolution (1920 × 1080), which provides sharp details, natural colours and wide viewing angles of 178°. IPS technology ensures an even and clear image even when you are not sitting directly in front of the screen, ideal for presentations, collaboration and multimedia content.

Easy connectivity with USB-C and HDMI

VOXICON Portable Screen+ makes it easy to get started. With USB-C, both video and power can be transmitted via a single cable, which minimises cable clutter and saves time. The monitor also has mini HDMI for compatibility with desktop PCs, game consoles and other video sources. Built-in stereo speakers provide a complete and portable system without the need for external accessories. The monitor is compatible with most modern laptops, MacBooks, tablets and other devices that support USB-C DisplayPort Alt Mode or HDMI.

Thought-out design for mobile use

The included protective case also works as an adjustable stand, allowing you to easily adapt the viewing angle to your needs. The CNC-machined black finish gives a stylish and professional impression, while the low power consumption makes the monitor ideal for mobile work. An excellent choice for consultants, students, remote workers and anyone who wants a flexible secondary screen on the go.
