

Power Socket 6Xsocket 1.5m White

Data sheet

Summary

- ✓ Six Type F AC outlets, useful for powering multiple EU-standard devices from one location.
- ✓ 1.5 m cable lets you position equipment away from the wall socket without extra extensions.
- ✓ Angled plug saves space behind desks and cabinets.
- ✓ Compact, linear layout keeps cables organised in server rooms, workstations, or conference areas.
- ✓ Designed for indoor use, check load requirements before connecting high-power equipment.

Product description

Why choose this power strip?

Prokord Power Socket 6Xsocket 1.5m White gives you six Type F outlets in a single, compact unit. It helps reduce cable clutter and gives flexible placement with a 1.5 m cable and angled plug for tight spaces. The white finish blends into office and meeting-room environments and supports indoor power distribution for multiple IT devices.

Power Socket 6Xsocket 1.5m White in short:

- Six Type F AC outlets, useful for powering multiple EU-standard devices from one location.
- 1.5 m cable lets you position equipment away from the wall socket without extra extensions.
- Angled plug saves space behind desks and cabinets.
- Compact, linear layout keeps cables organised in server rooms, workstations, or conference areas.
- Designed for indoor use, check load requirements before connecting high-power equipment.

Main functions

The Prokord Power Socket 6Xsocket 1.5m White provides straightforward power distribution for workstations, network gear, printers, and peripherals. The six outlets let you consolidate connections and avoid frequent plug swapping. The Type F sockets are compatible with common European plugs, so you can connect standard IT equipment without adapters.

Installation and everyday use

Set the power strip on a desk, inside a cabinet, or on the floor close to your devices. The angled plug helps when the wall socket is close to furniture, and the 1.5 m cable gives placement flexibility. Because this unit is intended for indoor use, place it where it stays dry and ventilated, and ensure connected devices do not exceed the circuit capacity.
