

Power Socket 6Xsocket 5m White

Data sheet

Summary

- ✓ Six Type F grounded outlets, suitable for powering PCs, monitors, printers, and network devices.
- ✓ 5 m cable lets you reach distant wall sockets without additional extensions.
- ✓ Angled Type F plug reduces strain and allows close-to-wall placement.
- ✓ White housing blends with light-coloured interiors, designed for indoor use only.
- ✓ One unit included; check wall socket orientation and cable routing before installation.

Product description

Why choose this power socket?

Prokord Power Socket 6Xsocket 5m White gives you six grounded Type F outlets on a 5 m cable, so you can place multiple devices without extra extension cords. It is built for indoor use with an angled plug that fits neatly behind desks and cabinets. This setup simplifies power distribution for workstations, printers, and meeting-room AV equipment while keeping cables organised.

Power Socket 6Xsocket 5m White in short:

- Six Type F grounded outlets, suitable for powering PCs, monitors, printers, and network devices.
- 5 m cable lets you reach distant wall sockets without additional extensions.
- Angled Type F plug reduces strain and allows close-to-wall placement.
- White housing blends with light-coloured interiors, designed for indoor use only.
- One unit included; check wall socket orientation and cable routing before installation.

Main function

Prokord Power Socket 6Xsocket 5m White consolidates multiple AC connections into a single, easy-to-position strip. The recessed outlets help keep plugs secure and aligned, so connected equipment stays organised and accessible. The angled plug makes it easier to install the strip close to furniture, reducing bend stress on the cable.

Practical use and placement

This power socket is intended for indoor environments such as offices, meeting rooms, and equipment closets. The 5 m cable gives flexibility for placement across a room, and the white finish keeps the strip visually unobtrusive. Since it uses a Type F plug and outlets, confirm compatibility with your local mains sockets during planning.
