

Prokord DB-D 0030

Data sheet

Core Specs

Cable length	5 m
Connector 1	DB9
Connector 2	DB9
Product colour	Beige

Summary

- ✓ Extends serial connections up to 5m for flexible device placement
- ✓ Straight DB9 male to DB9 female ends for simple plug and play
- ✓ Durable build ensures steady serial signals during extended use
- ✓ Neutral beige finish blends into racks and workspaces
- ✓ Works with legacy serial devices for easy system integration

Product description

Why choose this serial cable?

Prokord Serial Cable Ext DB9 Male- DB9 Female 5m provides reliable serial connectivity with a 5-meter reach and a rugged, molded design. It helps you extend RS-232 links between legacy devices with minimal setup time, offering steady signal transmission and flexible placement in server rooms, workshops, or production floors.

Prokord Serial Cable Ext DB9 Male- DB9 Female 5m in short:

- 5 m length allows you to bridge reasonable distances between equipment without adapters.
- Straight DB9 male to DB9 female connectors fit standard RS-232 ports for easy plug-and-play use.
- Beige, molded connectors with thumbscrew fastening provide a secure, stable connection.
- Suited for connecting serial peripherals such as terminals, routers, POS devices, and controllers.
- Note: Designed for standard serial speeds; not intended for high-speed differential signalling.

Reliable serial extension

This cable extends an existing serial link while maintaining consistent data transfer over the full 5-meter length. You can move devices further apart without adding converters or repeaters, which helps simplify cabling in racks and work areas.

Easy installation and compatibility

The straight DB9 male to DB9 female pairing connects directly to common RS-232 ports. The thumbscrew-style fastening keeps connectors secure under vibration or regular movement, so you spend less time troubleshooting loose connections.

Durable design and practical considerations

The cable features molded strain relief at each connector to reduce wear at stress points and a neutral beige finish that integrates into typical IT and industrial environments. Keep in mind the fixed length when planning layouts, and verify that your application requires standard serial speeds rather than higher-speed interfaces.

Technical Specification Matrix

Header

Manufacturer	Prokord
