

# Prokord DVI-DVI 0052

Data sheet

## Core Specs

|                |       |
|----------------|-------|
| Cable length   | 2 m   |
| Connector 1    | DVI-I |
| Connector 2    | DVI-I |
| Product colour | Black |

## Summary

- ✓ Dual link DVI enables higher resolutions, smooth high-bandwidth video
- ✓ Gold-plated contacts reduce corrosion, maintain stable signal quality
- ✓ Ferrite cores suppress interference, improve image clarity
- ✓ 2m length gives flexible placement, simplifies cable routing in racks
- ✓ Straight male DVI-I plugs connect digital and analogue displays

# Product description

## Why choose this cable?

Prokord Cable DVI-I - DVI-I Dual Link 2m Black gives you a straightforward way to connect DVI-equipped computers and displays with reliable signal quality. It supports dual-link bandwidth for higher-resolution displays, has gold-plated contacts for steady connections, and includes ferrite cores to reduce interference for consistent video in offices and AV setups.

## Cable DVI-I - DVI-I Dual Link 2m Black in short:

- Dual-link DVI for higher resolution and smoother refresh rates compared with single-link DVI.
- DVI-I male-to-male connectors carry both digital and analog signals, useful for legacy monitors and modern graphics cards.
- Gold-plated contacts help maintain stable connections and resist corrosion.
- 2 m length is suitable for typical desktop and meeting-room connections.
- Note: Verify that your devices accept DVI-I pinout, as some DVI ports are digital-only.

## Product details

The Prokord Cable DVI-I - DVI-I Dual Link 2m Black connects video sources to displays where DVI-I is required. It uses straight male connectors at both ends and is supplied as a single cable. Gold-plated contacts and built-in ferrite cores improve signal integrity and reduce interference, so you get consistent image output when linking workstations, projectors, or older monitors.
