

Internal Power Converter 4-Pin To SATA

Data sheet

Summary

- ✓ Converts a straight 4-pin male peripheral power connector to a straight SATA 15-pin female connector for powering internal drives and accessories.
- ✓ Compact internal cable that simplifies upgrades and reduces cable clutter in desktops and small server systems.
- ✓ Multicolour wiring makes identification and installation faster for technicians.
- ✓ Suitable for routine power conversion tasks in mixed-hardware environments.
- ✓ Not intended for high-power applications, check device power requirements before use.

Product description

Why choose this Internal Power Converter?

Prokord Internal Power Converter 4-Pin To SATA provides a straightforward way to adapt legacy 4-pin peripheral power outputs to modern SATA power inputs. It helps you reuse existing power supplies, reduce downtime during upgrades, and keep internal cable routing tidy. The straight male 4-pin and straight SATA 15-pin female connectors deliver a reliable connection for routine IT maintenance and system builds.

Internal Power Converter 4-Pin To SATA in short:

- Converts a straight 4-pin male peripheral power connector to a straight SATA 15-pin female connector for powering internal drives and accessories.
- Compact internal cable that simplifies upgrades and reduces cable clutter in desktops and small server systems.
- Multicolour wiring makes identification and installation faster for technicians.
- Suitable for routine power conversion tasks in mixed-hardware environments.
- Not intended for high-power applications, check device power requirements before use.

Internal Power Converter 4-Pin To SATA

This internal adapter features a straight 4-pin male connector paired with a straight SATA 15-pin female connector, making it easy to connect older power leads to modern SATA devices. The multicolour wires, including red, yellow and black conductors, aid quick identification during installation and servicing. Use it to streamline upgrades, replace worn connectors, or simplify cable management in everyday IT and maintenance tasks.
