- ✓ Metallic and yellow casing for quick visual identification.
- ✓ Supplied as a single unit.

Product description

Why choose this adapter?

Prokord Adapter Gender Changer VGA - VGA Low-Profile gives you a simple, reliable way to join two male VGA cables or adapt a cable end. The low-profile shape saves space behind racks and wall-mounted displays. A metal shell with captive screws improves connection stability, and the metallic and yellow casing makes ports easy to identify during installation.

Adapter Gender Changer VGA - VGA Low-Profile in short:

- Female-to-female VGA connector, lets you join two male VGA plugs.
- Low-profile form factor for tight spaces behind equipment.
- Metal housing and captive screws for a secure, reliable connection.
- Metallic and yellow casing for quick visual identification.
- Supplied as a single unit.

Product details

The Prokord Adapter Gender Changer VGA - VGA Low-Profile is a straightforward accessory for extending or adapting VGA connections without reterminating cables. Both ends use straight female VGA connectors and the compact body fits neatly where depth is limited. Use it to link monitors, projectors, or existing extension leads while keeping connections visible and secure.
