

Portreplicator

Data sheet

Summary

- ✓ Connects a USB-C host to HDMI, DVI, and VGA displays for TVs, projectors, and monitors.
- ✓ Supports HDMI up to 4K (4096 x 2160) at 30 Hz for video and slideshows on large screens.
- ✓ Delivers DVI at 1080p and VGA up to 1920 x 1200 for older displays and projectors.
- ✓ Compact silver housing and short cable for easy transport and tidy desk setups.
- ✓ Check that your device supports video output over USB-C before purchase.

Product description

Why choose this portreplicator?

Prokord Portreplicator lets you connect a USB-C laptop or tablet to DVI, HDMI, or VGA displays for presentations, video playback, or extra desktop space. It offers reliable 4K HDMI output and common legacy outputs in a compact silver adapter, making it practical for meeting rooms, classrooms, and hybrid work setups.

Prokord Portreplicator in short:

- Connects a USB-C host to HDMI, DVI, and VGA displays for TVs, projectors, and monitors.
- Supports HDMI up to 4K (4096 x 2160) at 30 Hz for video and slideshows on large screens.
- Delivers DVI at 1080p and VGA up to 1920 x 1200 for older displays and projectors.
- Compact silver housing and short cable for easy transport and tidy desk setups.
- Check that your device supports video output over USB-C before purchase.

Product details

The Prokord Portreplicator is a Type-C to DVI, HDMI and VGA adapter that connects USB-C devices such as MacBook and the Google Chromebook Pixel to external screens. Use the HDMI port for high-resolution video, the DVI port for HD monitors, and the VGA port for legacy projectors. The adapter is useful for presenting slides, sharing video, or extending your desktop when you need a simple, portable connection solution.
