

Power Strip 4X Socket 2xUSB 2.1 mAh 3m - White

Data sheet

Summary

- ✓ Four Type F outlets let you power monitors, printers, chargers and other desk equipment from a single location.
- ✓ Two USB ports (5 V, 2.1 A total) let you charge phones and tablets without extra adapters.
- ✓ Three metre cable and angled Type F plug give flexible placement and easier fitting behind furniture.
- ✓ Red rocker on/off switch provides quick control and helps cut energy use when devices are idle.
- ✓ Note: intended for indoor use only and not suitable for very high-power industrial equipment.

Product description

Why choose this power strip?

Prokord Power Strip 4X Socket 2xUSB 2.1 mAh 3m - White gives a tidy, flexible way to power and charge multiple devices from one place. Four Type F outlets and two USB ports let you run monitors and printers while charging phones and tablets. The three metre cable and angled plug ease placement behind furniture, and the red rocker switch helps reduce standby power use.

Power Strip 4X Socket 2xUSB 2.1 mAh 3m - White in short:

- Four Type F outlets let you power monitors, printers, chargers and other desk equipment from a single location.
- Two USB ports (5 V, 2.1 A total) let you charge phones and tablets without extra adapters.
- Three metre cable and angled Type F plug give flexible placement and easier fitting behind furniture.
- Red rocker on/off switch provides quick control and helps cut energy use when devices are idle.
- Note: intended for indoor use only and not suitable for very high-power industrial equipment.

Product details

The Prokord Power Strip combines organised mains distribution with integrated USB charging to reduce cable clutter in offices and home workspaces. The two USB ports deliver a combined 2.1 A at 5 V so you can charge mobile devices without occupying an AC socket. The narrow, vertical layout fits compact areas and keeps outlets aligned for multiple plugs.

Safety and control

Sockets include protective shutters and visible earth contacts to improve safety in busy environments. The prominent red rocker on/off switch gives a single, easy point to disconnect all connected equipment and reduce standby consumption. Fuse or surge protection is not specified, so plan placement accordingly.

Placement and installation

A three metre cable and angled Type F plug make it straightforward to position the strip where you need it, including behind desks and cabinets. The white finish blends into most interiors, and the product is supplied as a single unit ready for indoor use.
