Product description

Why choose this power cube?

Prokord Power Cube 4X Socket + 2xUSB 2.1 mAh 1.5m - White gives you a compact and practical way to power several devices in indoor spaces. It combines four angled Type F sockets with two USB ports and a 1.5 m cable to reduce clutter, improve access in tight spots, and support a more organised workspace or home setup.

Power Cube 4X Socket + 2xUSB 2.1 mAh 1.5m - White in short:

- Four angled Type F AC outlets for better access when sockets are close together
- Two built-in USB ports to charge phones and tablets without using an AC outlet
- 1.5 m cable for flexible placement around desks and entertainment areas
- Angled plug form factor reduces strain and improves fit in crowded wall sockets
- Designed for indoor use only; avoid outdoor or high-humidity environments

Practical power distribution

This power cube brings four AC outlets into a small footprint, so you can keep a monitor, printer, router, or lamp connected at the same time. The angled plug and outlet orientation make it easier to fit multiple bulky adapters without blocking neighbouring sockets. Prokord designed the unit to help you organise power for everyday devices.

USB charging and placement

Two USB ports let you charge mobile devices directly, so you do not need extra chargers taking up AC sockets. The 1.5 m cable gives enough reach to place the cube on or under a desk, behind furniture, or near a workstation while staying tidy and accessible.

Safety and appropriate use

The unit is intended for indoor environments and routine household or office equipment. It is not rated for outdoor use or locations with high humidity. Follow normal safety practices for power accessories and avoid overloading the sockets with high-power appliances.
