

4 In 1 Superior Lens For All Phones

Data sheet

Summary

- ✓ Universal clip-on design, fits most smartphones for quick attachment and removal.
- ✓ Three optical options: fisheye for creative distortion, macro for close-up detail, wide for larger scenes.
- ✓ Aluminium housing in black for durability and a professional look.
- ✓ 22 mm diameter keeps the lens compact and easy to align with the phone camera.
- ✓ Consider removing very thick cases for the best fit and alignment.

Product description

Why choose this photo lens?

Cirafon 4 In 1 Superior Lens For All Phones helps you expand mobile photography without buying a dedicated camera. It gives reliable, repeatable results thanks to aluminium construction and a simple clip-on design. You get fisheye, macro and wide perspectives for more creative shots, plus a compact footprint that works with most phone cameras for everyday use.

4 In 1 Superior Lens For All Phones in short:

- Universal clip-on design, fits most smartphones for quick attachment and removal.
- Three optical options: fisheye for creative distortion, macro for close-up detail, wide for larger scenes.
- Aluminium housing in black for durability and a professional look.
- 22 mm diameter keeps the lens compact and easy to align with the phone camera.
- Consider removing very thick cases for the best fit and alignment.

How it works and what it does

The lens set attaches with a spring-loaded clip that positions each lens over your phone camera, so you can switch between fisheye, macro and wide views in seconds. The macro lens lets you capture fine textures and small subjects. The wide lens increases field of view for groups and interiors. The fisheye lens produces a pronounced curved effect for creative shots. Aluminium housings keep weight down and resist wear, making the kit practical for field use and regular handling.
