

## **Video Adapter Kit FullHDMI DVI-D, DisplayPort, Mini DisplayPort, Micro HDMI, Mini HDMI**

### **Data sheet**

## **Summary**

- ✓ Five straight adapters that let you link HDMI to DVI-D, DisplayPort, Mini DisplayPort, Micro HDMI, and Mini HDMI connections.
- ✓ Designed for quick field use, AV carts, and test benches where multiple video formats appear.
- ✓ Black, low-profile adapters that fit neatly into service kits and travel cases.
- ✓ Straight connector form factors help keep connections aligned and stable.
- ✓ Check device compatibility before purchase, some signal directions or legacy ports may require active conversion.

# Product description

## Why choose this video adapter kit?

Prokord Video Adapter Kit Full gives you a compact set of adapters that simplify connecting devices with different video ports to HDMI displays. The kit reduces cable clutter and speeds up setup in meeting rooms, classrooms, and service calls, so you can focus on getting devices talking without searching for the right cable.

## Video Adapter Kit Full in short:

- Five straight adapters that let you link HDMI to DVI-D, DisplayPort, Mini DisplayPort, Micro HDMI, and Mini HDMI connections.
- Designed for quick field use, AV carts, and test benches where multiple video formats appear.
- Black, low-profile adapters that fit neatly into service kits and travel cases.
- Straight connector form factors help keep connections aligned and stable.
- Check device compatibility before purchase, some signal directions or legacy ports may require active conversion.

## Product details

The kit contains five compact adapters with an HDMI female interface and male connectors for DVI-D, DisplayPort, Mini DisplayPort, Micro HDMI, and Mini HDMI, all in a straight form factor and black finish. Each adapter lets you adapt a physical connection quickly, making it easier to connect laptops, cameras, tablets, projectors, and monitors without swapping bulky cables. Keep in mind these are passive adapters for matching connector types; certain source and display combinations may still need an active converter for signal conversion.
