

Conference Webcam 4k 1100

Data sheet

Summary

- ✓ 4K (3840 x 2160) video at 30 fps for detailed video calls, demos, and training recordings.
- ✓ Face tracking keeps a single presenter centered during presentations and remote lessons.
- ✓ Built-in microphone provides on-camera audio, reducing the need for a separate headset.
- ✓ Plug-and-play compatibility with Windows 8, Windows 10, and Windows 11 for fast setup.
- ✓ Compact and lightweight at 260 g, easy to mount on a monitor or place on a desk; consider available bandwidth and system resources for smooth 4K streaming.

Product description

Why choose this webcam?

Voxicon VX-1100-4K delivers 4K UHD clarity and reliable operation for clearer meetings, product demos, and recorded content. It simplifies deployment with plug-and-play setup and broad Windows compatibility, so you can improve video quality without adding complex configuration or extra audio equipment.

VX-1100-4K in short:

- 4K (3840 x 2160) video at 30 fps for detailed video calls, demos, and training recordings.
- Face tracking keeps a single presenter centered during presentations and remote lessons.
- Built-in microphone provides on-camera audio, reducing the need for a separate headset.
- Plug-and-play compatibility with Windows 8, Windows 10, and Windows 11 for fast setup.
- Compact and lightweight at 260 g, easy to mount on a monitor or place on a desk; consider available bandwidth and system resources for smooth 4K streaming.

Video performance

The Voxicon VX-1100-4K captures high-resolution 4K footage to show fine detail in demonstrations and participant faces. The camera is tuned for steady 30 fps playback, which balances clarity and network demands for typical conferencing and recording workflows.

Usability and compatibility

Setup is straightforward thanks to plug-and-play operation. Face tracking helps maintain framing when you move, so you can focus on the presentation instead of camera positioning. The built-in microphone supplies basic on-camera audio for meetings and streams. The camera works with Windows 8, Windows 10, and Windows 11, making it easy to integrate into existing Windows-based environments.

Design and installation

The slim, horizontal design and mounting clip make it simple to attach to a monitor or position on a flat surface. At 183 mm wide, 64 mm high, 54 mm deep, and 260 g, it stays discreet while offering stable placement. For best results when streaming in 4K, check your network bandwidth and the host PC performance before deployment.

Technical Specification Matrix

Header

Manufacturer	Voxicon
--------------	---------

Performance

Maximum video resolution	3840 x 2160 (4K/UHD) pixels
--------------------------	-----------------------------

Camera HD type	Quad HD
Maximum frame rate	30 fps
Supported video modes	3840p
3D	No
Resolution at capture speed	3840x2160@30fps, 3840x2160@60fps
Face tracking	Yes
Plug and Play	Yes

Design

Built-in microphone	Yes
---------------------	-----
