Product description

Why choose this cleaning brush?

Prokord Smart Home Sparepart Cleaning Brush For W411-3 helps you keep sensitive smart home parts free of dust and debris, reducing the need for service and maintaining reliable device performance. It is compact and easy to use, so routine cleaning becomes a quick task that protects sensors, vents, and connectors.

Smart Home Sparepart Cleaning Brush For W411-3 in short:

- Designed for routine cleaning of W411-3 smart home devices, reaches vents, sensor openings, and small crevices.
- Soft synthetic bristles remove dust without scratching delicate surfaces.
- Slim, ergonomic handle gives precise control and includes a hanging hole for neat storage.
- Lightweight plastic construction for easy handling during regular maintenance.
- Consideration: do not submerge the brush in liquids or use strong solvents.

Main features

The brush is made for careful, targeted cleaning of smart home components. You can use the narrow head and soft bristles to clear dust from vents, sensor lenses, and connector areas without applying pressure. The long handle helps you reach tight spots while the hanging loop keeps the brush handy in service kits or maintenance stations.
