

Headset M655u Volume Control UsbStereo USB-A

Data sheet

Summary

- ✓ Wired USB-A connection for plug-and-play use with standard desktop PCs and workstations.
- ✓ Boom microphone designed to focus on voice and reduce background noise for clearer calls.
- ✓ Supraaural ear cups and an adjustable head-band for extended wearing comfort during long shifts.
- ✓ Simple on-headset volume control button for quick level adjustments without interrupting work.
- ✓ Note: this model uses USB-A and wired connectivity only, and supraaural cushions provide moderate passive noise isolation rather than full noise cancelling.

Product description

Why choose this headset?

Voxicon VXDK-HM655U# wired headset delivers reliable USB Type-A connectivity, comfortable head-band wear, and clear voice pickup with a boom microphone. It reduces setup time for desktop users, keeps latency low during calls, and supports long shifts with lightweight construction and supraaural cushions that help minimise fatigue.

VXDK-HM655U# in short:

- Wired USB-A connection for plug-and-play use with standard desktop PCs and workstations.
- Boom microphone designed to focus on voice and reduce background noise for clearer calls.
- Supraaural ear cups and an adjustable head-band for extended wearing comfort during long shifts.
- Simple on-headset volume control button for quick level adjustments without interrupting work.
- Note: this model uses USB-A and wired connectivity only, and supraaural cushions provide moderate passive noise isolation rather than full noise cancelling.

Comfortable all-day wear

The Voxicon VXDK-HM655U# is built for extended use in office and call centre environments. The head-band design distributes pressure evenly and the supraaural pads sit on the ear to keep the headset lightweight. That combination helps reduce fatigue during back-to-back calls and long support shifts.

Clear voice and simple controls

30 mm drivers and a 20–20,000 Hz frequency range reproduce speech naturally, making conversations easier to follow. The boom microphone picks up the speaker’s voice while limiting ambient noise. A dedicated volume control button lets you change levels without switching applications or reaching for the PC.

Easy deployment and compliance

With a 1.5 m cable and USB Type-A connector the headset is straightforward to connect and manage across many desktop setups. Wired connectivity avoids pairing and battery maintenance, which simplifies fleet deployment. The product meets REACH and RoHS requirements, supporting common procurement and safety standards.

Technical Specification Matrix

Header

Manufacturer	Voxicon
--------------	---------

Performance

Product type	Headset
Wearing style	Head-band

Recommended usage	Office, Call center
Headset type	Stereo
Product colour	Black
Volume control	Button
Cable length	1.5 m

Ports & interfaces

Connectivity technology	Wired
USB connectivity	Yes
USB connector	USB-A

Headphones

Ear coupling	Supraaural
Headphone frequency	20 - 20000 Hz
Driver unit	30 mm
Impedance	32 Ohm
Headphone sensitivity	42 dB

Microphone

Microphone type	Boom
-----------------	------

Weight & dimensions

Width	14.2 mm
Depth	2.7 mm
Height	15.8 mm

Sustainability

Sustainability certificates	REACH, RoHS
Sustainability compliance	Yes
