

USB Headset VXI6B ANCStereo USB-A Black

Data sheet

Summary

- ✓ USB-A plug-and-play connection for easy deployment on standard workstations and desk phones with USB-A.
- ✓ In-line control unit with volume -, volume +, mute, and answer/end call buttons for fast call handling.
- ✓ Noise-canceling boom microphone and microphone frequency range tuned for clear speech in noisy environments.
- ✓ Supraaural ear pads and adjustable head-band for comfortable wear during extended use.
- ✓ Note: wired USB-A design requires a free USB-A port or an adapter if your device only has USB-C.

Product description

Why choose this headset?

Voxicon USB Headset VXI6B ANC is a wired stereo headset designed for office and call-center environments. It combines clear voice capture from a noise-canceling boom microphone with simple USB-A plug-and-play connectivity. The in-line control unit and long cable make daily call handling and desk moves straightforward while cushioned supraaural ear pads support longer shifts.

USB Headset VXI6B ANC in short:

- USB-A plug-and-play connection for easy deployment on standard workstations and desk phones with USB-A.
- In-line control unit with volume -, volume +, mute, and answer/end call buttons for fast call handling.
- Noise-canceling boom microphone and microphone frequency range tuned for clear speech in noisy environments.
- Supraaural ear pads and adjustable head-band for comfortable wear during extended use.
- Note: wired USB-A design requires a free USB-A port or an adapter if your device only has USB-C.

Comfortable all-day wear

The headset uses a head-band design and soft supraaural cushions to reduce pressure during long shifts. The black finish and fold-free construction keep the profile compact while the 1.8 m cable gives you room to move without disrupting calls.

Clear communication

Voxicon USB Headset VXI6B ANC pairs 40 mm drivers and a wide headphone frequency response for natural sounding speech and meeting audio. The boom microphone includes noise-canceling technology and covers the voice frequency band for consistent call clarity.

Simple connectivity and compliance

This wired headset connects via USB-A for consistent audio and call control integration with common softphones. The in-line controls let you adjust volume and manage calls without switching apps. The product meets REACH and RoHS compliance, supporting procurement requirements for regulated environments.

Technical Specification Matrix
