Product description

Why choose this mobile device charger?

Cirafon CC-PDC30B mobile device charger offers Power Delivery fast charging from your vehicle cigar lighter, so you can top up phones and tablets quickly while on the road. Its compact black design saves space in the socket and helps reduce downtime for drivers and passengers who rely on mobile devices for work.

CC-PDC30B mobile device charger in short:

- USB-C Power Delivery port for faster charging of PD-compatible phones and tablets.
- Standard USB-A port for older devices and common accessories.
- Plugs into a vehicle cigar lighter for charging on the move.
- Compact black housing with visible Cirafon branding that sits neatly in most car sockets.
- Consideration: confirm the cigar lighter socket in your vehicle is functional and accessible before purchase.

Product details

The Cirafon CC-PDC30B lets you power a phone and an accessory or tablet from a single car socket using a USB-C Power Delivery port and a USB-A port. Plug it into the vehicle cigar lighter and connect your cables for straightforward charging on the move. A small power indicator confirms when the unit is active, and the compact black housing stays visually low profile in the cabin.
