

In-ear HeadphonesBlack

Data sheet

Summary

- ✓ Comfortable in-ear design with silicone tips, suitable for long calls, commuting, and workouts.
- ✓ Wired 3.5 mm connection for plug-and-play use with laptops, audio players, and phones that have a headphone jack.
- ✓ Inline microphone and single-button remote for hands-free calling and basic playback control.
- ✓ Flat cable and compact form help reduce tangles and make it easy to carry.
- ✓ Check device compatibility if your phone lacks a 3.5 mm port, you may need an adapter.

Product description

Why choose this headset?

Acutek ACDK-M41 offers a straightforward in-ear headset that balances call clarity, music playback, and secure fit for active use. It gives reliable wired connectivity and a simple inline control, so you can stay connected with fewer interruptions and no need to charge a battery.

ACDK-M41 in short:

- Comfortable in-ear design with silicone tips, suitable for long calls, commuting, and workouts.
- Wired 3.5 mm connection for plug-and-play use with laptops, audio players, and phones that have a headphone jack.
- Inline microphone and single-button remote for hands-free calling and basic playback control.
- Flat cable and compact form help reduce tangles and make it easy to carry.
- Check device compatibility if your phone lacks a 3.5 mm port, you may need an adapter.

Comfortable sound and secure fit

ACDK-M41 is built for everyday use, from voice calls to music and sport. The in-ear fit and soft tips help keep the earbuds in place during movement. You get usable sound and clear voice pickup without extra setup, so it is easy to use across devices with a standard headphone jack.

Simple, reliable connectivity

The wired design uses a 3.5 mm connector for direct compatibility with many computers and audio devices. The inline microphone and single-button control let you answer calls and control basic playback without reaching for your device. The black finish and flat cable offer a practical, low-maintenance option for daily carry.
