

Tranzip TR-275S-64

Data sheet

Core Specs

Storage Capacity	64 GB
Device interface	USB-A
Product colour	Black

Summary

- ✓ 64GB capacity stores presentations, backups and shared files
- ✓ USB-A with USB 3.2 Gen 1 delivers fast file transfers
- ✓ Slide design protects the connector and fits pocket or bag
- ✓ RoHS and REACH compliant for responsible IT procurement

Product description

Why choose this datastick?

Tranzip Datastick 64GB gives you portable, straightforward storage for everyday file transfer and backup. The USB 3.2 Gen 1 interface speeds up large file moves compared with older USB 2.0 drives. Its slide form factor protects the connector without a separate cap. Compliance with RoHS and REACH supports responsible procurement and helps reduce regulatory risk.

Tranzip Datastick 64GB in short:

- 64GB capacity for documents, presentations, and a moderate media library.
- USB-A plug with USB 3.2 Gen 1 performance for faster transfers on compatible hosts.
- Slide design protects the connector and keeps the drive compact while you carry it.
- Black finish that fits a professional workspace and IT kits.
- Consider device compatibility, as this model uses a USB-A connector rather than USB-C.

Product details

Tranzip Datastick 64GB is a simple, plug-and-play USB flash drive for moving and storing files between PCs and legacy USB-A ports. The sliding mechanism retracts the connector when not in use, reducing wear and the chance of losing a cap. With built-in RoHS and REACH compliance, it meets common environmental and safety standards often required in IT procurement. The drive is supplied as a single unit per pack for easy stocking and distribution.
