

Bag For 2.5" Extern HDD With CardPocket

Data sheet

Summary

- ✓ Designed for 2.5-inch external hard drives, suitable for transport and backup rotation.
- ✓ Semi-rigid shell and zip closure protect against everyday knocks and dust.
- ✓ Built-in card pocket keeps SD cards and small accessories together with the drive.
- ✓ Wrist strap offers easy handling when you move between locations.
- ✓ Consideration: sized for 2.5-inch drives only, not for larger desktop drives.

Product description

Why choose this bag?

Cirafon Bag For 2.5" Extern HDD With CardPocket provides a compact, protective carry solution for 2.5-inch external hard drives. It reduces the risk of bumps and keeps cables and memory cards organized. The semi-rigid exterior and zip closure make it simple to carry between sites and store with other IT equipment.

Bag For 2.5" Extern HDD With CardPocket in short:

- Designed for 2.5-inch external hard drives, suitable for transport and backup rotation.
- Semi-rigid shell and zip closure protect against everyday knocks and dust.
- Built-in card pocket keeps SD cards and small accessories together with the drive.
- Wrist strap offers easy handling when you move between locations.
- Consideration: sized for 2.5-inch drives only, not for larger desktop drives.

Compact protection

The bag keeps a single 2.5-inch drive secure while you travel or move between workspaces. The rigid-feeling exterior helps shield the drive from impact and abrasion. The zip closure stays fast during transit so you can store the bag inside a laptop bag or briefcase without extra wrapping.

Organized storage

Inside, the card pocket gives a dedicated place for SD cards, microSD adapters, or a short USB cable. That reduces the chance of losing small items and speeds up access when you need to restore or swap drives. The layout makes it easy to carry the essentials for on-site maintenance or offsite backups.

Portable and practical

The wrist strap makes the bag quick to grab and frees your hands when you need it. The compact footprint keeps it unobtrusive in crowded bags and workstations. If you need a straightforward solution to protect and organise a single 2.5-inch external drive, this bag fits that purpose.
