

Rack Fixing Set 50-pack

Data sheet

Summary

- ✓ Steel button-head screws that sit low and help prevent snagging, useful for rack rails, panels, and brackets.
- ✓ Includes matching cage nuts and protective washers to secure components and protect surfaces during installation.
- ✓ Pack of 50 pieces, convenient for routine service, equipment deployment, and spare-part inventory.
- ✓ Built for repeated installation cycles and general repair work.
- ✓ Consideration: not ideal for severe corrosion environments unless coated, and not for extremely heavy load-bearing applications.

Product description

Why choose this screw kit?

Prokord PRO-19-SET-50 screw kit provides a practical, reliable fastening solution for routine assembly and maintenance. Its steel construction and button head design deliver steady clamping and reduced surface damage. The kit helps you speed up installations, simplify server and equipment mounting, and keep spare parts on hand for recurring maintenance tasks.

PRO-19-SET-50 in short:

- Steel button-head screws that sit low and help prevent snagging, useful for rack rails, panels, and brackets.
- Includes matching cage nuts and protective washers to secure components and protect surfaces during installation.
- Pack of 50 pieces, convenient for routine service, equipment deployment, and spare-part inventory.
- Built for repeated installation cycles and general repair work.
- Consideration: not ideal for severe corrosion environments unless coated, and not for extremely heavy load-bearing applications.

Use and function

The Prokord PRO-19-SET-50 kit combines button-head screws with cage nuts and washers to make mounting and securing IT equipment straightforward. The button head eases alignment and reduces the risk of surface marring, while the cage nut lets you fasten into square-hole rails without tapping threads. Protective washers cushion contact points and help prevent wear on painted or plated surfaces, so you can focus on efficient, repeatable installations.
