Product description

Voxicon Antiblue Glasses Nick

Improve health and productivity with our high-quality anti-blue glasses, which effectively block 99% of all blue light from screens. Designed with a sturdy and comfortable TR90 frame combined with aluminum-magnesium arms, these glasses offer both durability and comfort for everyday use.

Scratch-resistant lenses

The polycarbonate lenses are not only lightweight but also exceptionally scratch-resistant and feature both anti-reflective and anti-glare treatments. This minimizes eye strain and interference from screens, making them ideal for office environments and workplaces with intensive screen time.

Flash blocking

Our glasses block 99% of blue light from digital screens, protecting eyes from harmful effects and reducing eye fatigue.

UV protection

With a built-in UV filter, they effectively protect the eyes from harmful ultraviolet rays, helping to preserve eye health during prolonged exposure.

Stylish Design

Full frame design for a professional and sophisticated look, perfect for office environments.
