- ✓ USB 2.0 support for dependable data transfer and device sync
- ✓ 1.3 m length gives flexible reach without excess desk clutter
- ✓ White jacket with molded connectors offers neat look and durability

Product description

Why choose this USB cable?

Cirafon CF-AC-TPE-1.3-W USB cable 1.3 m USB 2.0 USB A USB C White gives a simple, dependable way to connect USB-A hosts to USB-C devices. It is suited for everyday charging and data syncing at a convenient 1.3 metre length. The white finish keeps a low profile on desks and in meeting rooms, while the right-angle-free connectors make plugging straightforward.

CF-AC-TPE-1.3-W in short:

- Connects standard USB-A ports to USB-C devices for charging and data transfer.
- 1.3 metre length balances reach and cable management for desk or travel use.
- Reversible USB-C connector makes everyday plugging easier.
- Molded connector ends add strain relief for longer service life.
- Note: USB 2.0 limits data throughput compared with USB 3.x, so consider this for high-speed transfer needs.

Product details

The Cirafon CF-AC-TPE-1.3-W is a male USB-A to male USB-C cable made for routine device pairing, syncing, and charging. You can use it to connect laptops, chargers, or hubs with USB-A ports to phones, tablets, and peripherals that use USB-C. The cable length gives flexibility without excess slack, and the molded connector housings help reduce wear where most cables fail. The white design fits cleanly into office and customer-facing environments.
