Summary

- ✓ 2 m length gives flexible reach for desktops and meeting rooms
- ✓ USB-A to USB-C male plugs connect legacy PCs to modern devices
- ✓ USB 2.0 supports dependable data transfer and charging
- ✓ Durable black jacket fits professional office and IT environments
- ✓ Made by CirafoN for consistent quality and compatibility

Product description

Why choose this USB cable?

Cirafon CF-AC-TPE-2.0-B# is a 2 m USB 2.0 A-to-C cable that delivers reliable charging and everyday data transfer. The longer length gives more reach for desk setups and wall chargers. Black molded connectors help reduce strain at the plugs, making it a practical choice for routine charging and syncing of phones, tablets, and accessories.

Cirafon CF-AC-TPE-2.0-B# in short:

- 2 m USB-A to USB-C cable for charging and syncing between USB-A hosts and USB-C devices.
- USB 2.0 connection, suitable for standard data transfer and device charging.
- Black cable with molded connector ends for everyday handling and reduced wear.
- Male-to-male connectors for direct connection to chargers, computers, and power banks.
- Consider that USB 2.0 does not support the highest data throughput or newer power-delivery features.

Product details

The Cirafon CF-AC-TPE-2.0-B# connects a USB-A port to a USB-C device for convenient charging and file sync. Its 2 m length helps avoid tight routing and makes wall outlets and desktop chargers easier to use. The molded connector ends provide a sturdier connection point for consistent daily use.
