- ✓ USB-A to USB-C male connectors link legacy hosts to modern devices
- ✓ USB 2.0 compatibility supports reliable data sync and charging
- ✓ White finish blends into office setups for a tidy look

Product description

Why choose this USB cable?

Cirafon CF-AC-TPE-2.0-W# USB cable 1.3 m USB 2.0 USB A USB C White gives you a simple, reliable link between older USB-A ports and modern USB-C devices. It saves time by letting you charge and sync phones, tablets, and accessories without adapters. The modest length and clean white finish make it easy to use on desks, in cars, or with portable chargers.

CF-AC-TPE-2.0-W# USB cable 1.3 m USB 2.0 USB A USB C White in short:

- Connects USB-A hosts to USB-C devices for charging and data transfer.
- 1.3 m length provides convenient reach for desk and in-car use.
- USB 2.0 is suitable for everyday syncing and standard charging.
- White finish keeps installations tidy and unobtrusive.
- Consideration: not intended for USB 3.x high-speed transfers or high-current fast charging.

Product details

The Cirafon CF-AC-TPE-2.0-W# is a male-to-male USB-A to USB-C cable designed for routine charging and file syncing. Use it to connect phones, tablets, power banks, car chargers, and older laptops that still offer USB-A ports. The cable balances reach and portability, making it practical for daily use. If you require faster data rates or higher charging power, select a cable rated for USB 3.x or specific fast-charge standards.
