Product description

Why choose this headset?

Voxicon VXDK-HM755U-C provides a reliable wired connection and clear voice capture for busy office and call centre environments. It combines on-ear comfort, simple button controls, and a USB-C connector for modern devices. This reduces interruptions and speeds up call handling while meeting RoHS and REACH sustainability requirements.

VXDK-HM755U-C in short:

- Wired USB-C stereo headset for consistent audio and simple connection to modern laptops and phones.
- Boom microphone and focused audio tuning for clear speech on calls and virtual meetings.
- On-ear supraaural cushions and an adjustable headband designed for multi-shift use.
- Inline buttons including volume control and call handling, with a 1.5 m cable for flexible desk setup.
- Note that this model is wired only, so a USB-C port is required.

Audio and voice clarity

Voxicon VXDK-HM755U-C delivers balanced stereo sound suited to voice, conference calls, and training audio. The headset uses 40 mm drivers and a 20 to 20,000 Hz frequency response to keep speech intelligible across common call platforms. The boom microphone is positioned for direct voice pickup to reduce background noise and maintain consistent call quality.

Comfort, controls and compliance

The head-band design and soft on-ear pads reduce fatigue during long shifts while the adjustable fit adapts to different users. Physical buttons make volume adjustments and call control quick and intuitive, and the 1.5 m cable gives freedom of movement at a desk. The USB-C connection avoids adapter clutter, and RoHS and REACH compliance supports regulatory and sustainability requirements.
