Product description

Why choose this keyboard and mouse set?

Voxicon Wired Slim Metal Keyboard 280 + Mouse Gr1000 gives you a practical, wired input solution that balances a slim metal design with full-size functionality. The Nordic QWERTY layout and numeric keypad speed up data entry, while the USB connection and adjustable keyboard height keep setup simple and comfortable for everyday office tasks.

Wired Slim Metal Keyboard 280 + Mouse Gr1000 in short:

- Slim metal full-size keyboard with integrated numeric keypad, suited for spreadsheets and prolonged typing.
- Nordic QWERTY layout, matching regional key placement and characters.
- Wired USB connection for a stable plug-and-play setup, with a 1.5 m cable for flexible desk placement.
- Adjustable keyboard height and Windows keys for easier shortcuts and improved typing posture.
- Includes a wired mouse Gr1000 for everyday navigation; consider the cable length when planning desk layout.

Design and build

The Voxicon Wired Slim Metal Keyboard 280 combines a thin metal top with black and silver accents for a professional desk appearance. The full-size (100%) layout keeps all standard keys and a numeric keypad within reach. The included mouse follows the same understated look, so both devices sit neatly on a shared workspace.

Setup and daily use

Both keyboard and mouse use USB power and interface, so you can connect them directly to a workstation without drivers in most cases. The 1.5 m cable gives reasonable placement options while keeping the connection reliable. Adjustable keyboard height helps you find a better typing angle during long work sessions.

Fit for the workplace

This set is aimed at office environments where predictable, low-maintenance input devices are needed. It is suited to tasks like data entry, document editing, and general desktop navigation. The wired connection removes concerns about battery replacements or wireless interference, making it a practical choice for shared workstations or desk-based roles.
