

Magnetic mobile holder with charging and quick release for Tesla (MagSafe/Qi2)

Data sheet

Summary

- ✓ Reusable Suction Cup: Features glue injection technology for a strong, secure grip that can be reused multiple times.
- ✓ Pressure Valve: Adds extra stability and reliability, even when subjected to heavy loads.
- ✓ High Capacity: Supports weights of 40-60 pounds (approximately 18-27 kg).
- ✓ Temperature Resistant: Performs reliably in extreme temperatures from -20°C to +95°C.
- ✓ MagSafe and Qi 2 Compatibility: Enables seamless wireless charging with a magnetic connection.

Product description

Cirafon Magnetic Mobile Holder with Charging and Quick Release for Tesla (MagSafe/Qi2)

Looking for a flexible and secure way to keep your phone or other devices in place during your drive? The Cirafon Magnetic Car Holder with Charging and Quick Release for Tesla (MagSafe/Qi2) offers a reliable solution to ensure your device stays safe while you're on the road.

This holder's innovative design allows it to be easily mounted on your car's dashboard or the back of your screen. Designed specifically with Tesla vehicles and other large-screen-equipped cars in mind, it provides a stable attachment point and features an adjustable head so you can find the perfect angle for comfortable viewing.

Compatible with Cirafon Magnet Ring Charger

Maximize the functionality of your setup by pairing the Cirafon Tesla Quick Mount with the Cirafon Magnetic Phone Holder with Charger. This universal phone mount includes a powerful magnet and supports wireless charging, making it compatible with both Apple MagSafe and Qi 2 technologies. You can wirelessly charge your device while it's secured in place, and the magnetic mount allows for quick transitions between landscape and portrait modes — perfect for GPS navigation or enjoying your music on the go.

Key Features

- Reusable Suction Cup: Features glue injection technology for a strong, secure grip that can be reused multiple times.
- Pressure Valve: Adds extra stability and reliability, even when subjected to heavy loads.
- High Capacity: Supports weights of 40-60 pounds (approximately 18-27 kg).
- Temperature Resistant: Performs reliably in extreme temperatures from -20°C to +95°C.
- MagSafe and Qi 2 Compatibility: Enables seamless wireless charging with a magnetic connection.
- Adjustable Position: Effortlessly switch between landscape and portrait orientations for optimal viewing.
- Rotatable Head: Customize the viewing angle for better visibility and usability of your device.

Why Choose the Cirafon Magnetic Mobile Holder with Charging and Quick Release for Tesla?

- Universal Compatibility: Designed to work with traditional dashboards as well as modern vehicle displays like those in Tesla cars.
- Durable and Sustainable: The suction plug is built to last, with repeatable use that maintains performance over time.
- Effortless Installation: Quick and easy to attach or remove without leaving marks on surfaces.
- Enhanced Functionality: Pair with the Cirafon Magnet Ring Charger for convenient wireless charging and flexible device positioning.
- Sleek Design: Combines modern aesthetics with practical usability, making it an excellent addition to any car.

Whether you're commuting, road-tripping, or simply driving around town, the Cirafon Magnetic Mobile Holder with Charging and Quick Attach for Tesla (MagSafe/Qi2) offers a premium solution for keeping your devices secure, charged, and always within reach.
