

POWER SOCKET 5XSOCKET 2M PROTECT

Data sheet

Summary

- ✓ Provides five AC outlets to power multiple devices at a single location, ideal for test benches, maintenance tasks, and temporary setups.
- ✓ 2 m cable gives flexible placement without extra extension cords.
- ✓ IP44 splash-proof rating and yellow hinged covers protect sockets from splashes and debris.
- ✓ Integrated on/off switch lets you quickly cut power to all connected devices.
- ✓ Note: IP44 protection is for splashes and light rain in sheltered conditions, not for immersion or strong water jets.

Product description

Why choose this power extension?

Prokord D-GSP-05K-A-B is a practical power extension that gives you five accessible AC outlets on a 2 m cable. It combines splash-proof protection and hinged outlet covers to keep connections safer in sheltered outdoor areas and busy workshops. The built-in on/off switch makes it easy to control power to multiple devices without unplugging equipment.

D-GSP-05K-A-B in short:

- Provides five AC outlets to power multiple devices at a single location, ideal for test benches, maintenance tasks, and temporary setups.
- 2 m cable gives flexible placement without extra extension cords.
- IP44 splash-proof rating and yellow hinged covers protect sockets from splashes and debris.
- Integrated on/off switch lets you quickly cut power to all connected devices.
- Note: IP44 protection is for splashes and light rain in sheltered conditions, not for immersion or strong water jets.

Key features and use

Prokord D-GSP-05K-A-B is designed to keep several devices powered and organized. The five outlets make it easy to run monitors, chargers, small tools, or networking equipment from one strip. The visible switch and long cable reduce the need to reach behind racks or furniture to manage power.

Safety and placement

The IP44 rating and covered sockets add a level of protection suitable for garages, covered outdoor events, and maintenance areas. Use the product in sheltered outdoor locations or indoors. Avoid exposing it to direct heavy rain or immersion, and turn off the switch before plugging or unplugging devices to reduce risk.
