- ✓ M8 x 35 mm (4 pcs)

Product description

PROKORD WALLMOUNT HEAVY-DUTY 60–120" 125 KG

PROKORD Wallmount Heavy-Duty is a robust wall mount developed for extra large and heavy TVs in professional and demanding environments. The design is adapted for screens from 60 to 120 inches and supports a max weight of up to 125 kg. The wall mount is made of steel with a fine-textured black powder-coated finish, which provides high stability and long service life. With a low profile of only 32 mm, it allows for a discreet and stable installation close to the wall.

Design, strength and compatibility

The wall mount supports a very wide range of VESA standards, up to 1200x800, and is compatible with most very large TVs, including curved models. The construction is strength-tested to four times the specified max load for increased safety. The fixed wall plate is combined with a split design that simplifies transport and handling, while the quick-release feature facilitates installation. An included hook-mounted spirit level helps ensure correct alignment during installation.

Installation, screws and important information

The wall mount is intended for installation on solid walls or double studs with a stud spacing of 406, 450 or 600 mm. Installation hardware and mounting instructions are included.

The following screws and accessories for TV mounting are included in the package:

Screws

- M6 x 14 mm (4 pcs)
- M8 x 16 mm (4 pcs)
- M6 x 30 mm (4 pcs)
- M8 x 35 mm (4 pcs)

Spacers

- D8 (4 pcs)
- Ø15 × Ø8 × 5 mm (4 pcs)
- Ø15 × Ø8 × 15 mm (4 pcs)

Please note that the included screws are not always compatible with all TV brands and models. Depending on the TV design, additional screws or spacers may be required to achieve correct and safe installation.

If needed, we recommend Standard Screw Kit, which contains a wide selection of screws and spacers and is a practical complement during installation.

Technical Specification Matrix
