Product description

Why choose this TV?

Voxicon VVXV875QG 75" 4K QLED ANDROID TV + CHROMECAST Konferenskit delivers a large-format 4K display with QLED color and broad HDR support to keep presentations and video content clear and lifelike. Google TV and the included Chromecast make casting and app access straightforward, while multiple inputs and audio return channel support simplify integration with meeting-room AV systems.

VVXV875QG 75" 4K QLED ANDROID TV + CHROMECAST Konferenskit in short:

- 75-inch 4K QLED display, suited for conference rooms and shared spaces where readability and color accuracy matter.
- Google TV with Android 14 and Chromecast for easy casting, streaming apps, and voice control.
- HDR support including Dolby Vision and HDR10+, plus Dolby Atmos decoding for improved video and audio fidelity.
- HDMI 2.1 ports, eARC and HDCP 2.3 for connecting laptops, conferencing devices, and external sound systems.
- Consider room layout and mounting options for a 75" screen, and confirm installation requirements before purchase.

Display and image processing

The 75" QLED panel shows detailed 4K content and handles a wide color range, which helps when presenting high-resolution slides, video, or detailed documents. Built-in HDR formats such as Dolby Vision and HDR10+ improve contrast and highlight detail in mixed lighting. Motion Estimation Motion Compensation and a 60Hz refresh rate reduce motion blur for video playback and live streams.

Smart features and connectivity

This TV runs Google TV on Android 14, so you can access mainstream streaming apps like Netflix, YouTube, Amazon Prime Video and Spotify directly. Chromecast simplifies screen sharing from laptops and mobile devices during meetings. Network options include Ethernet and Wi-Fi, and Miracast and Bluetooth 5.1 support peripheral and wireless connections. Three HDMI inputs and USB recording make it easy to switch between sources and capture content when needed.

Audio, control and management

Audio decoders include Dolby Atmos and DTS, and eARC support lets you route high-quality audio to an external soundbar or AV system. The set offers practical meeting-room features such as timeshift, USB recording, game and movie modes, and firmware updates via USB or network. Remote control, voice control and Google Assistant compatibility streamline day-to-day operation, and the wide range of On Screen Display languages supports multi-location deployment.
