- ✓ Display filter features: Anti-reflective, Privacy
- ✓ Aspect ratio: 16:9
- ✓ Limits viewing angle: 60 °
- ✓ Privacy filtering orientation: Landscape
- ✓ Touchscreen compatible: Yes
- ✓ Installation type: Hanger arm + Command strip

Product description

CIRAFON Privacy Filter 18" 16:10 – Privacy filter for laptop (388 × 242 mm)

Why choose this privacy filter?

CIRAFON Privacy Filter 18" 16:10 is designed to protect sensitive information on larger laptops in open and mobile work environments. The filter limits the viewing angle to approximately 60°, which means the screen content is only clearly visible to the person sitting directly in front of the computer. Ideal for working in open-plan offices, on trains and planes, or in other public environments.

The frameless design preserves the screen's aesthetics while providing effective privacy protection without compromising the user experience.

Effective privacy with a clear image

The privacy filter reduces the risk of visual exposure by darkening the image from side angles, while maintaining sharpness and readability for the user. This allows you to work with confidential documents, customer data, or business-critical information without having to change your workplace.

The anti-glare treated surface reduces reflections from windows and strong lighting, providing a more comfortable working environment throughout the day. The filter is also compatible with touchscreens and does not affect touch responsiveness or precision.

Durable surface for daily use

The surface is resistant to scratches and fingerprints, which makes the filter suitable for daily use in demanding environments. This contributes to easier cleaning and a more professional presentation of your work equipment.

Easy, tool-free installation

Can be mounted quickly and easily without tools using the included mounting solution for landscape use. The filter is adapted for 18" screens in 16:10 format and fits active screen areas measuring 388 × 242 mm. Always check your device's exact screen dimensions before installation to ensure a correct fit.
