

UC003AENC Over-Ear USB Headset with ENC Microphone and Volume Control USB-A/USB-C Stereo USB-A, USB-C Black,

Data sheet

Product description

VOXICON UC003AENC – Over-ear USB Headset with ENC and volume control (USB-A + USB-C)

Clear and professional communication

VOXICON UC003AENC is a professional over-ear headset developed for companies that place high demands on clear communication. The advanced ENC technology (Environmental Noise Cancellation) reduces disturbing background noise and ensures that your voice is heard clearly and distinctly, even in open office environments or other dynamic workplaces. The headset is an excellent choice for digital meetings, customer support and daily communication in hybrid work environments.

Smooth control during calls

The integrated volume control on the cable provides quick and easy access to key functions during calls and meetings. Adjust the audio level directly without having to leave the meeting or change settings on the computer, which makes the workflow more efficient.

Comfort for the entire workday

The large, padded over-ear cushions enclose the ears and provide a comfortable fit even during long workdays. The adjustable headband allows the headset to be easily adapted to the user, while the flexible microphone boom makes it possible to position the microphone optimally for clear voice pickup.

Flexible connectivity with USB-A and USB-C

VOXICON UC003AENC comes with both USB-A and USB-C, which makes the headset compatible with a wide range of computers and devices. The headset is plug-and-play and works directly with popular meeting platforms such as Microsoft Teams, Zoom and Google Meet, without the need for installation or drivers.

Technical Specification Matrix

Header
