- ✓ Support for both Windows and macOS with dedicated system modes and Fn Lock function.
- ✓ US International QWERTY layout for multilingual use and international work environments.

Product description

Why choose this keyboard?

Voxicon DK-219WLB-INT Wireless Office Keyboard QWERTY US International black combines flexible wireless connectivity with a full-size layout for efficient work at home or in the office. With support for three connection channels (2.4 GHz, BT1 and BT2) you can easily switch between multiple devices. The membrane keys provide a quiet and comfortable typing experience, while support for both Windows and macOS makes the keyboard a versatile choice for modern workplaces.

DK-219WLB-INT Wireless Office Keyboard in brief:

- Full-size 100 % layout with numeric keypad, ideal for spreadsheets, accounting and productive office work.
- Wireless connection via 2.4 GHz USB-A dongle and two Bluetooth channels (BT1 and BT2) for up to three connected devices at the same time.
- Quiet membrane keys for a pleasant typing experience in shared work environments.
- Multimedia features with shortcuts for volume, playback, brightness, search and app switching.
- Support for both Windows and macOS with dedicated system modes and Fn Lock function.
- US International QWERTY layout for multilingual use and international work environments.

Design and typing experience

The keyboard has a sleek black design and a slim profile that suits both home offices and professional workplaces. The low-profile membrane keys minimize noise levels while providing a comfortable and responsive typing feel during long workdays. The full-size layout with numeric keypad streamlines work with numbers and data, while the US International layout enables easy use of multiple languages and special characters.

Connectivity and installation

DK-219WLB-INT offers maximum flexibility with three different connection modes, 2.4 GHz via the included USB-A dongle and two separate Bluetooth devices. You can easily switch between for example a desktop PC, tablet and laptop without having to re-pair the keyboard. The product is compatible with both Windows and macOS and has dedicated functions for each operating system.

Multimedia and productivity

The keyboard is equipped with multimedia functions that provide quick access to common commands, including volume control, playback, track change, brightness, search function, app switching and lock screen. With Fn Lock the multimedia functions can be used directly without having to hold down the Fn key, which results in a smoother workflow.

Ideal use cases and considerations

This keyboard suits users who want to combine the productivity of a full-size office keyboard with the freedom of working wirelessly. It is particularly suitable for administrative tasks, accounting, home offices and users who switch between multiple devices during the workday. Thanks to support for both Windows and macOS it works just as well in mixed IT environments as in the modern home office.
