- ✓ VESA: up to 800x600
- ✓ Height adjustment: 1100–1600 mm (motorised)
- ✓ Tilt: +5° to -10°

Product description

PROKORD Motorised TV Trolley for conference rooms and classrooms.

PROKORD motorised TV trolleys on wheels are a premium solution for companies that need a flexible, mobile and professional installation for large displays. Perfect for conference rooms, educational environments, hotels and receptions where presentations, video meetings and information sharing are in focus.

With support for screens up to 100 inches and 120 kg the trolley handles even the largest and heaviest displays on the market, with high stability and safety.

Motorised height adjustment with memory function

The powerful dual motor makes it easy to adjust the height between 110–160 cm using the included remote control. Two memory presets let you quickly switch between pre-defined positions, perfect for different users and environments.

Optimised for video meetings and presentations

The trolley is equipped with both a camera shelf and adjustable tray, which makes it ideal for modern meeting rooms. Place a camera, codec or other equipment directly on the cart for a complete solution.

Robust construction for professional use

Manufactured from steel, aluminium and durable materials for a long service life. The construction is tested to withstand up to four times the specified max load, which provides extra safety in demanding environments.

Mobile and stable design

The heavy duty castors make it easy to move the trolley between rooms, while the locking mechanism ensures that it stands firmly during use.

Flexible viewing with tilt function

Adjust the screen between +5° and -10° for an optimal viewing angle and reduced glare, regardless of whether the audience is sitting or standing.

Technical highlights

- Suitable for screens: 55–100 inches
- Max load: 120 kg
- VESA: up to 800x600
- Height adjustment: 1100–1600 mm (motorised)
- Tilt: +5° to -10°
