

Privacy screen protector GlassiPhone 16

Data sheet

Summary

- ✓ Privacy filter that limits viewing from the side
- ✓ Double tempered 9H glass that protects against scratches and impacts
- ✓ Preserves the screen's natural and responsive touch feeling
- ✓ Oleophobic coating that counteracts fingerprints and dirt
- ✓ Made of 60 % recycled glass

Product description

Cirafon Ultra-Clear Double Tempered Privacy

Protect both your screen and what is shown on it. Cirafon Ultra-Clear Double Tempered Privacy is a durable screen protector in tempered glass with a privacy filter that limits viewing from the side. This makes it harder for people around you to see the screen content when you are for example commuting, working in a café or spending time in other public environments.

The double tempered 9H glass helps protect the screen against scratches, impacts and other damage that can occur during daily use. At the same time, the phone's natural touch feeling is preserved so the screen feels smooth and responsive even with the protector installed.

Protects the screen and your privacy

The privacy filter reduces the screen's viewing angle and thus limits visibility from the sides. The content is most clearly visible when you look straight at the screen, practical when you handle email, messages or other information that you do not want to share with people nearby.

The tempered glass provides a durable protection without the soft or rubbery feel that can occur with plastic screen protectors. The oleophobic coating also helps reduce fingerprints, grease and dirt, making the screen easier to keep clean.

Made of 60 % recycled glass

The screen protector is made of 60 % recycled glass and combines robust protection with more resource-efficient material use. The thin design follows the phone's display and provides a discreet protection for everyday use.

Easy and precise installation

The included installation frame helps you position the screen protector correctly right from the start. This makes installation faster and reduces the risk of misalignment and air bubbles.

For more complete protection

A screen protector protects the display while a phone case helps protect the phone's edges, back and corners. Combine the screen protector with a case from Cirafon for more all-round protection.
