

Privacy screen protector GlassiPhone 17

Data sheet

Summary

- ✓ Protector type: Privacy screen protector
- ✓ Brand compatibility: Apple
- ✓ Compatibility: iPhone 17
- ✓ Maximum screen size: 6.1 "
- ✓ Light transmission: 63 %

Product description

CIRAFON ULTRA-CLEAR (DOUBLE TEMPERED) PRIVACY

The glass in a smartphone needs to conduct touch effectively while also being durable enough for everyday use. With a premium screen protector from Cirafon, the screen is effectively protected against scratches, cracks and other damage, without compromising the feel of the original display.

Cirafon Ultra-Clear (Double Tempered 9H) Privacy is developed to combine high technical performance with discreet and effective privacy protection. The privacy filter limits the screen's viewing angles, which means that the content is only visible directly from the front and helps protect sensitive information in public environments.

The tempered privacy glass from Cirafon provides a thin and durable protection for the phone's display while preserving the same responsive feel as the original glass. No rubbery feel as with traditional plastic protectors. The glass also has an oleophobic surface treatment that helps reduce fingerprints, grease stains and dirt for a cleaner and clearer screen.

The screen protector is made of 60 % recycled glass and comes with a smart installation frame that makes application simple, quick and bubble free.

Screen protector

It often takes only a single drop for the phone's display to crack, which can be both costly and time consuming to repair. To protect your phone from everyday damage, a screen protector is always recommended.

Cirafon offers carefully selected and tested screen protectors with tempered 9H glass that provide durable protection without affecting touch function or image quality.

Why glass is better than plastic

A screen protector in tempered glass provides a significantly better feel compared to plastic, combined with high impact resistance and scratch resistance. Glass is also easier to apply and minimizes the risk of air bubbles that often occur with plastic film.

With a privacy glass from Cirafon you retain the same touch experience as without a screen protector, while the display gets effective protection and increased privacy.

For optimal protection

For even better overall protection, complement the screen protector with a phone case from Cirafon.

Easy installation

The included installation frame helps you position the screen protector correctly from the start, making the installation quick, easy and bubble free.

Technical Specification Matrix

Header
