- ✓ Preserves the screen touch and clarity
- ✓ Ultra-thin design for a natural feel
- ✓ Oleophobic surface against fingerprints and dirt
- ✓ Easy, bubble-free application

Product description

Ultra-thin Privacy Tempered Glass Screen Protector – Full Touch & 9H Protection

Protects your screen without compromise

Your phone screen is in constant use and needs both durability and precision. With a tempered glass screen protector you get effective protection against scratches, impacts and everyday wear, without affecting the feel or the screen response.

Privacy filter for increased confidentiality

The integrated privacy filter limits viewing from the side and makes the screen clearly visible only when viewed straight on. Perfect for use in public environments where you want to protect sensitive information.

Crystal-clear feel and full functionality

The high-quality glass preserves the screen sharpness, colour reproduction and touch sensitivity. You get the same smooth user experience as with the original screen, without a rubbery feel or reduced responsiveness.

Thin, durable and dirt-repellent

With a hardness of 9H, the glass provides strong protection against scratches and minor impacts. The oleophobic coating reduces fingerprints, grease marks and dirt, which keeps the screen clean for longer.

Easy to apply, perfect result

A glass screen protector is easy to install and provides an even, bubble-free surface. It stays firmly in place and feels like a natural part of the screen.

Why you should choose a glass screen protector

Unlike plastic, glass provides a more premium feel, better durability and a smoother surface. You get protection that is barely noticeable, but that makes a big difference if an accident happens.

Benefits

- Privacy filter that protects against side views
- Tempered glass with high scratch resistance (9H)
- Preserves the screen touch and clarity
- Ultra-thin design for a natural feel
- Oleophobic surface against fingerprints and dirt
- Easy, bubble-free application
