

# Prokord DPCC14C1510W

Data sheet

## Core Specs

|                |       |
|----------------|-------|
| Cable length   | 1 m   |
| Connector 1    | C14   |
| Connector 2    | C15   |
| Product colour | White |

## Summary

- ✓ Prokord 1m cable links a C14 male to a C15 female connector
- ✓ White jacket keeps rack installations neat and easy to trace
- ✓ Copper conductors deliver dependable power and stable connection
- ✓ Straight molded ends ensure secure mating with IEC inlets

# Product description

## Why choose this power cable?

Prokord Power Cable is a compact, 1 m IEC power lead that gives a reliable connection between devices with C14 and C15 inlets. It helps reduce cable clutter and simplifies rack or desktop installations, while copper conductors ensure steady conductivity and long-term use.

## Power Cable in short:

- IEC C14 to IEC C15 connectors, for direct connection to compatible inlets.
- 1 m length, suited to short runs behind equipment, PDUs, and UPS systems.
- White colour, useful where a lighter cable aesthetic is preferred or to match white enclosures.
- Copper conductor for consistent power transfer and durability.
- Check that your equipment uses a C15 inlet before purchase.

## Main functions

The Prokord Power Cable connects equipment with IEC C14 and C15 connections quickly and securely. Its straight male and female connectors make insertion and removal simple in crowded cabinets. The 1 m length keeps power runs tidy and improves airflow in racks. White insulation helps the cable blend into lighter-coloured setups, and copper conductors support dependable everyday power distribution.
