HDMI ports quantity	3
---------------------	---

Summary

- ✓ When you want a clear picture in the meeting room without complicated installation
- ✓ If you need a reliable screen for presentations or video calls
- ✓ When you want direct access to streaming services without external media players
- ✓ If you are looking for a stylish TV that works just as well in the lounge as in the home office

Product description

Voxicon QLED TV series with Google TV

Introduction

The Voxicon QLED TV series combines 4K resolution, modern connectivity and Google TV in a clean design for both work and entertainment. Whether you are presenting in a meeting room, relaxing in a lounge or streaming at home, you get a sharp picture, easy operation and access to a wide range of apps and services.

Who is it for?

- When you want a clear picture in the meeting room without complicated installation
- If you need a reliable screen for presentations or video calls
- When you want direct access to streaming services without external media players
- If you are looking for a stylish TV that works just as well in the lounge as in the home office

Advantages of QLED compared to LED

QLED technology uses Quantum Dots to improve colour reproduction and provide a larger colour volume. The result is more accurate shades and higher brightness, which makes details clearer in presentations, video calls, movies and sports. Compared to traditional LED TVs, QLED provides a more vivid and consistent viewing experience over time.

Google TV – all entertainment gathered in one place

Google TV gathers apps, streaming services and recommendations in a user friendly interface. You can easily switch between Netflix, YouTube, Disney+ and other popular services without having to connect external devices. Built in Chromecast makes it easy to share presentations, videos or images directly from your phone or computer, while Google Assistant lets you search and control content with your voice.

No built in TV tuner – developed for streaming

This model has no built in TV tuner and can therefore not receive terrestrial, cable or satellite TV via antenna or TV socket.

Instead, it is designed for modern streaming habits. With Google TV you get access to apps for movies, series and live TV via various Play and streaming services. This provides a flexible and future proof solution without the need for an external TV receiver or traditional TV subscription.

Link your Google account – completely optional

If you link your Google account, you get access to more features, such as installing apps via Google Play, creating personal recommendations and synchronising your Watchlist between different devices. At the same time, the TV works perfectly well even without logging in, giving you the freedom to use it in the way that suits you best.

Picture and sound

4K Ultra HD and QLED technology reproduce details and colours with high precision. Support for modern HDR formats, including HDR10 and Dolby Vision, provides better contrast and greater depth in both bright and dark scenes. Together with Dolby Atmos, this creates a more immersive experience for movies, sports, presentations and everyday use.

Connectivity and compatibility

The series offers modern connections such as HDMI 2.1 with eARC/ARC, USB ports, Ethernet, WiFi and Bluetooth. Support for HDCP 2.3 ensures compatibility with current devices and services. Whether you connect a laptop, a sound system, a game console or a media player, the TV integrates easily into your existing environment.

Design and installation

The slim and minimalist design allows the TV to blend naturally into both professional and private environments. The model is supplied with a stand and supports VESA mounting for flexible placement in meeting rooms, home offices, lounge areas or living rooms.

Why choose the Voxicon QLED TV series?

- QLED with Quantum Dots and 4K for sharp image and high colour accuracy
- Google TV with apps, voice control and built in Chromecast
- No traditional TV tuner – focus on modern streaming services and Play apps
- Option to link a Google account for more features, but not required
- HDR and Dolby support for improved picture and sound experience
- Modern connections for easy integration with computers, sound systems and media players

Technical Specification Matrix

Header

Manufacturer	Voxicon
--------------	---------

Display

Screen size	86 "
HD type	4K/UHD
Display resolution	3840 × 2160 pixels
Display technology	QLED
