

Rugged Case for MacBook Neo13" Polycarbonate (PC)

Data sheet

Summary

- ✓ Hybrid construction in PC and shock-absorbing TPU
- ✓ Reinforced corners for increased impact protection
- ✓ Protects against scratches, impacts and minor drops
- ✓ Transparent back that preserves the MacBook design
- ✓ Precise cutouts with full access to all ports
- ✓ Rubber feet provide stability and better grip on the surface

Product description

Why choose this MacBook case?

Cirafon Rugged Case is designed for anyone who wants to give their MacBook extra durable protection in everyday use. The combination of a hard polycarbonate (PC) back and a shock-absorbing TPU frame helps protect the computer against scratches, impacts and minor drops, while the transparent back lets the MacBook design show through. Precise cutouts provide full access to all ports and functions without needing to remove the case.

Cirafon Rugged Case in brief:

- Hybrid construction in PC and shock-absorbing TPU
- Reinforced corners for increased impact protection
- Protects against scratches, impacts and minor drops
- Transparent back that preserves the MacBook design
- Precise cutouts with full access to all ports
- Rubber feet provide stability and better grip on the surface
- Two piece construction that is easy to install

Extra protection when needed

Cirafon Rugged Case is designed for those who often bring their MacBook between home, the office and studies. The reinforced frame absorbs impacts while the hard back protects against scratches and wear. The result is a robust case that offers higher protection than a traditional slim case, without making the computer unnecessarily bulky.

Easy installation and full functionality

The two piece construction is quickly installed by snapping onto the top and bottom of the computer. The case is model specific with precise cutouts for ports, speakers and charging, so all functions can be used without removing the protection.

Robust design for daily use

The transparent back highlights the MacBook design while the shock-absorbing TPU frame provides a secure grip and extra protection around edges and corners. The rubber feet on the underside provide stability on the desk and help the computer stand firmly during use.

Technical Specification Matrix

Header

Manufacturer	Cirafon
--------------	---------

Features

Fits laptops up to	13 "
Material	Polycarbonate (PC)
Case type	Shell case
Product main colour	Transparent
Brand compatibility	Apple
Quantity	1
Protection features	Scratch resistant
Country of origin	China

Weight & dimensions

Width	300 mm
Depth	210 mm
Height	20 mm
Weight	220 g
