### Belkin USB 2.0 and FireWire ExpressCard - USB-/FireWire-adapter - ExpressCard/34 - Firewire - 2 portar + 1 x Hi-Speed USB

Why ExpressCard? ExpressCard, the new standard destined to replace CardBus, effectively quadruples the amount of available computing bandwidth. This results in faster music downloads, smoother streaming video, and lightning-fast access to mass-storage devices. The Belkin USB 2.0 and FireWire ExpressCard offers the perfect solution for users who want to add fast FireWire and Hi-Speed USB 2.0 ports to their notebook computer. The ExpressCard takes advantage of the additional bandwidth and features provided by the new ExpressCard I/O interconnection standard. Now you can stream movies and download video from your camcorder to your hard drive simultaneously-without worrying that your computer will freeze, crash, or slow down to a trickle. ExpressCard future-proofs your notebook computer with technology so advanced that it exceeds the processing-speed capability of many devices currently on the market. Installing the ExpressCard now will give you device-upgrade expansion room for many years to come.
