DR-2010C / DR-2510C

imageFORMULA

Whether you introduce the DR-2010C or the even faster DR-2510C you'll find a whole host of powerful functionality delivering high productivity scanning for groups of users or whole departments. At the same time you'll find a device that makes the process simple, efficient, and a trouble-free part of your working day.

Simple to use but undeniably powerful performance

High Speed

Utilising Canon's new innovative CIS Sensor, the DR-2010C/2510C document scanners deliver the same highly productive speeds whether you're scanning black and white, grayscale or colour.

Expect high productivity of 20 ppm or 40 ipm for double-sided documents using the DR-2010C. And for top-end performance, choose the DR-2510C, equipped with the latest ultrasonic double-feed detection system and capable of 25 ppm or 50 ipm for double-sided documents.

High Image Quality

Whatever you need to scan, from poor quality NCR paper to faint coloured text documents with dark detailed backgrounds, the DR-2010C/2510C delivers exceptional high quality results with an optical resolution of 600dpi and outstanding image processing features.

Advanced intelligent image processing, such as Advanced Text Enhancement, Colour Dropout, Moiré Reduction and Prevent Bleed Through all ensure quality images for maximum legibility and excellent read rates for all your OCR/ICR applications.

Productivity and reliability

Boost productivity and reliability even further with beneficial features such text orientation recognition, auto colour detection, skip blank page and Canon's rapid recovery system.

Easy to use

However you wish to use scanning to improve your business, ease of use is a key factor in ensuring your staff readily embrace any new technology. The DR-2010C/2510C is a delight to use. With 3 programmable job buttons you can, in a "one touch" operation, quickly carry out simple tasks, such as scan-to-email or scan-to-file - without the need to open any additional software.

Impressive document handling

Count on the DR-2010C/2510C for trouble-free scanning. A slanted paper path design is employed which ensures optimum feed reliability, from thin to thick and embossed media. Use the DR-2010C/2510C to scan your documents, business cards, ID Cards (e.g. driving license), photographs and A3 Documents (in folio mode). What's more with auto page size detection and de skew, scanning mixed document types requires no special preparation - just stack and scan - resulting in perfectly cropped and straightened images.

Small and compact

The DR-2010C/2510C is designed to deliver robust performance from a compact footprint, with a daily rated duty cycle of 1,500pgs. It's easily positioned on the corner of a desk, on a small cabinet, or centrally - for the whole team to access. Both models sport their own stylish appearance but share a common footprint of just 298 (W) x 160 (D) x 160 (H) mm and weigh a mere 2.4 kg - making them the lightest, and one of the smallest, scanners in their class.

Auto Power ON/OFF

For added convenience the DR-2010C/2510C can be automatically switched ON/OFF, in-line with the PC it's connected to. This prevents the scanner from being accidentally left ON and contributes towards overall energy efficiency.

Software

The DR2010C/2510C is designed to give you effortless plug-and-play scanning. And to aid your productivity we've also included a suite of powerful software to provide more sophisticated functionality whenever you need it.

Capture Perfect - Canon's versatile software scanning application offers a user-friendly interface and flexible file savings options such as searchable and encrypted PDF, Scan to Mail, Scan to Presentation and many other useful features.

Adobe Acrobat 8 Standard - Industry's leading application for the creation of PDF files, Adobe Acrobat features robust tools for document sharing and security, file commenting, and much more.

Scansoft Paperport SE - This file management application is renowned for its intuitive and user-friendly graphic user interface, making it easy to store, organize, and retrieve your digital documents.

Nuance Omnipage SE - Convert original paper documents into editable electronic files through OCR.

Presto! Bizcard Reader 5 SE - Scan business cards to convert and organise important contact information into a searchable database.

**High quality results
with outstanding
image processing**
