

Mini KVM Switch Kit for 2 PCs

Includes KVM Switch and 2 Sets of Built-in Cables

The DKVM-2K 2-port mini KVM switch kit is a cost effective kit for home and office users. This kit allows you to easily control 2 different PCs from a single set of keyboard, mouse, and VGA monitor. It includes a 2-port KVM (Keyboard, Video and Mouse) switch and 2 sets of built-in cables for ready connection to 2 PCs. The switch provides many easy to use features and is perfect for home and small businesses.

Cost-effective for PC Users

If you have 2 PCs and need to use them at the same time, the DKVM-2K saves you the money and space by allowing you to control your 2 computers from a set of keyboard, monitor and mouse. Or, you may have a better, bigger monitor and want to connect both PCs to it, the DKVM-2K allows you to do this. 2 sets of cables are attached to the KVM switch ready for use, dispensing you of the need to prepare separate cables and connect them to the switch.

Versatile Functions

The DKVM-2K utilizes advanced microprocessor emulation to intelligently manage each KVM port. This allows simultaneous boot-up of all attached PCs. Autoscan, audible feedback, and keyboard "Hot Keys" make the DKVM-2K simple to use and manage. There is also a control button located on the front panel that allows you to switch between the PCs.

Status Save and High Resolution Support

The DKVM-2K supports VGA, SVGA, and MultiSync monitors at up to 2048 x 1536 resolution at 72Hz refresh rate. Support for Microsoft IntelliMouse is provided.

Key Features

- Allows control of 2 computers using 1 set of keyboard, monitor and mouse
- Saves desktop space, cost
- Auto scan mode sequences through PCs
- Audible feedback for confirmation while switching between PCs
- Front panel LED indicators for selected PC
- Switching between PCs using front panel SELECT button or Hot Key command
- Supports SVGA, VGA, and multi-sync monitors
- Video resolutions up to 2048 x 1536
